

Descriptions of All Six Organizational Health Levels

Servant Leadership	Org ⁶	Optimal Health	Workers experience this organization as a servant-minded organization characterized by authenticity, the valuing and developing of people, the building of community and the providing and sharing of positive leadership. These characteristics are evident throughout the entire organization. People are trusted and are trustworthy throughout the organization. They are motivated to serve the interests of each other before their own self-interest and are open to learning from each other. Leaders and workers view each other as partners working in a spirit of collaboration.
	Org ⁵	Excellent Health	Workers experience this organization as a servant-oriented organization characterized by authenticity, the valuing and developing of people, the building of community and the providing and sharing of positive leadership. These characteristics are evident throughout much of the organization. People are trusted and are trustworthy. They are motivated to serve the interests of each other before their own self-interest and are open to learning from each other. Leaders and workers view each other as partners working in a spirit of collaboration.
Paternalistic Leadership	Org ⁴	Moderate Health	Workers experience this organization as a positively paternalistic (parental-led) organization characterized by a moderate level of trust and trustworthiness along with occasional uncertainty and fear. Creativity is encouraged as long as it doesn't move the organization too far beyond the status quo. Risks can be taken, but failure is sometimes feared. Goals are mostly clear, though the overall direction of the organization is sometimes confused. Leaders often take the role of nurturing parent while workers assume the role of the cared-for child.
	Org ³	Limited Health	Workers experience this organization as a negatively paternalistic (parental-led) organization characterized by minimal to moderate levels of trust and trustworthiness along with an underlying uncertainty and fear. People feel that they must prove themselves and that they are only as good as their last performance. Workers are sometimes listened to but only when they speak in line with the values and priorities of the leaders. Conformity is expected while individual expression is discouraged. Leaders often take the role of critical parent while workers assume the role of the cautious child.
Autocratic Leadership	Org ²	Poor Health	Workers experience this organization as an autocratic-led organization characterized by low levels of trust and trustworthiness and high levels of uncertainty and fear. People lack motivation to serve the organization because they do not feel that it is <i>their</i> organization or <i>their</i> goals. Leadership is autocratic in style and is imposed from the top levels of the organization. It is an environment where risks are seldom taken, failure is often punished and creativity is discouraged. Most workers do not feel valued and often feel <i>used</i> by those in leadership. Change is needed but is very difficult to achieve.
	Org ¹	Toxic	Workers experience this organization as a dangerous place to work ... a place characterized by dishonesty and a deep lack of integrity among its workers and leaders. Workers are devalued, <i>used</i> and sometimes <i>abused</i> . Positive leadership is missing at all levels and power is used in ways that are harmful to workers and the mission of the organization. There is almost no trust and an extremely high level of fear. This organization will find it very difficult to locate, develop and maintain healthy workers who can assist in producing positive organizational change.
